

Forage Blowers

S55HO & S55
1000 RPM **540 RPM**

The auger is driven by 2 sets of double 5VX type V-belts on cast iron pulleys. The feed auger has a 2" Ø drive shaft mounted on 2 cast iron, NTN, flanged ball bearings.

The large 14" Ø with 10" pitch (optional 16" Ø with 16" pitch) auger ensures a positive and even feed to the fan. The throw-out clutch is efficient, easily accessible and safe.

Technical Data

	S55 540 rpm	S55HO 1000 rpm
HP (recommended)	Min. 60 hp Max. 150 hp	Min. 150 hp Max. 200 hp
Feed auger		
Diameter	14" (35.5 cm)	
Pitch	10" (25.4 cm)	
Main fan		
Blades	8	
Diameter	59" (150 cm)	
Weight	1496 lb (680 kg) (without 1000 RPM gearbox)	
Optional	16" feed auger with 16" pitch (min. 150 hp) Over running clutch kit	

All drive mechanisms can be easily reached thanks to hinged protection doors.

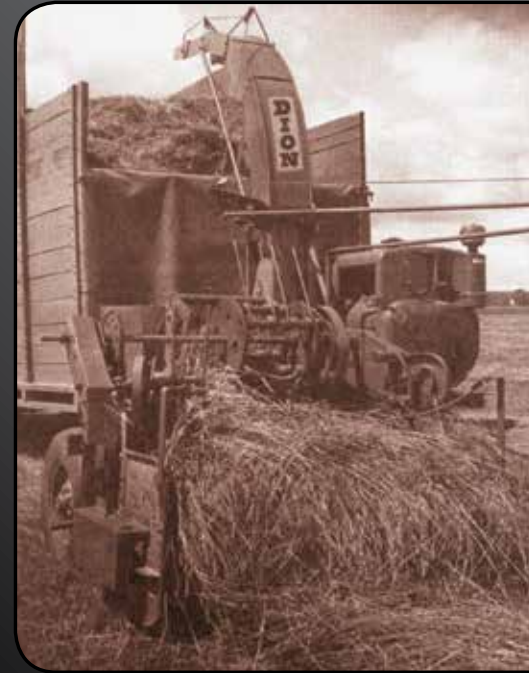

Your best choice for harvesting equipment since 1920

Dion's products have over 95 years of service to farmers.

Today Dion is at the forefront in the conception, design and manufacturing of agricultural equipment. Our rotary, row independent, corn heads for pull-type forage harvesters are just one of our products putting industry leading technology within the reach of everyone.

Our vision of modern, efficient & performance oriented equipment allows us to see a promising future filled with quality products like you've come to expect from the Dion brand
